## Function Introduction

**Remark:** Below functions can be adjusted or turned on/off by remote control. Details will be listed later in this manual.

**Auto lid**---Auto open the lid when human body gets close to the front of toilet.

**Foot sense to open the lid or the seat ring**---Auto open the lid or the seat ring when human body gets close to the toilet.

**H/C massage**---Cleaning water will alternate hot and cold.

**Rear cleansing**---Single hole nozzle, powerful cleansing.

**Moving rear cleansing**---Nozzle moving to wash with wide range.

**Front cleansing**---Special nozzle hole for female, gently cleansing.

**Moving front cleansing**---Nozzle moving to wash with wide range.

**Child cleansing (optional)**---No need to seat sense, one-button cleansing.

**Strength adjustment**---Adjust the cleansing strength according to what you like.

**Position adjustment**---Adjust cleansing position by moving the nozzle forward and backward.

**Cleansing water temp. adjustment**---4 levels of cleansing water temp. circulation adjustment: normal/high/medium/low.

**Warm air drying**---Drying after cleansing.

**Seat sense**---All functions can be conducted after seated.

**Seat ring temp. adjustment**---Seat ring with built-in heating device; 4 levels of seat temp. circulation adjustment: normal/high/medium/low.

**Smart seat temp. (optional)**---Auto adjust the seat temperature according to different seasons.

**Remote control**---All functions can be conducted by the remote control.

**Auto flush**---Auto flush after you use the toilet and stand up.

**Flush by remote control**---Flush by pressing the flushing button on the remote control.

**Blackout flush**---Can flush manually, not subject to power outage.

**Foot sense flush**---Can flush by foot sense.

**Night light**---With light inside, convenient for night using.

**Nozzle cleaning**---Press this button when unseated, the nozzle will be self-cleaning, easy for daily maintenance.

**Nozzle auto cleaning**---Nozzle will be auto-cleaning before and after using.

**Blackout flush (optional)**---With built-in standby battery, can operate cleansing and flushing functions when power outage.

**Foam shield (optional)**---Has the effects of deodorization, splash-proof, anti-stick and bacteria-proof etc.

## Attention

### WARNING

NO  
DISASSEMBLE

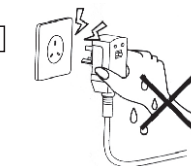

**Please do not disassemble, repair or modification of this product.**

◆ May to cause fire, electric shock damage.

NO  
WATER

**Please do not use wet hand to pull the plug.**

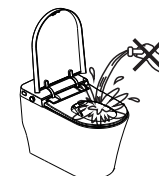

◆ May to cause electric shock damage.

NO  
SOAKING

**Please do not pour water, or detergent or deodorant, etc. on the equipment and the power plug.**

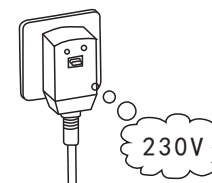

◆ May to cause fire, electric shock damage.

PROHIBIT

**Only support 230V AC. Please do not put through power supply before making sure the inlet valve open.**

◆ May to cause fire.

PROHIBIT

**No scratch,damage the wire.No change,curve/tensile,bend.bind.bear.pirch the wire.No using loosening socket.**

◆May to damage the wire,to canse electric shock or fire.

PROHIBIT

**Do not connect with outer water supply**

◆May to cause corrosion inside and fire.

◆May to cause inflammation of the skin.

GROUND WIRE

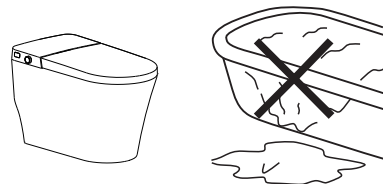

**Please be sure to come it with the ground wires.**

◆It is easy to get an electric shock when failure and leakage.

PROHIBIT

**Do not put it in the wet area.**

◆Easy to get an electric shock and fire.

ABIDANCE

**Long time using,set the temperature to the normal level.**

◆Long time using +1 level.may cause scald.

NO BURNING

**Keep away from fire.**

◆Easy to get on fire.

ABIDANCE

**Chilren,old man.patient.tired person. drunk person.person who having sleeping pills.**

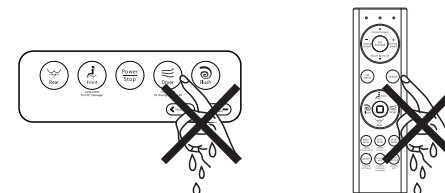

**The above stated people,need to be accompanied with .and set the dry temperature on 1.**

◆Long time uing +1 level.may cause scald.

PROHIBIT

**Do not use wet hand to operate remote control, or to purl the remote.**

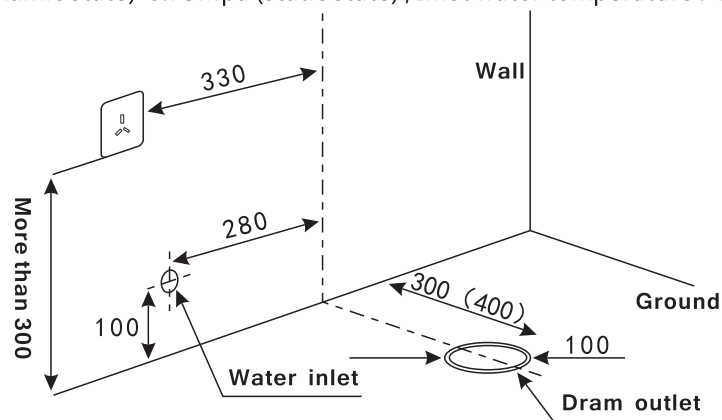

◆Easily lead to the remote control failure.

## Installation Instructions

### ■ Intelligent toilet installation method

#### 1. Confirmation of installation environment

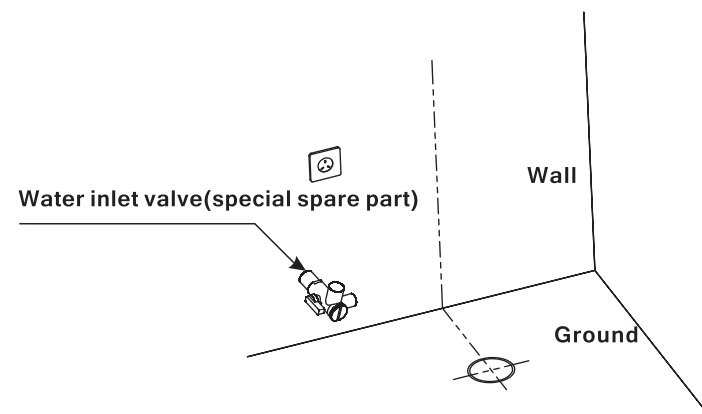

Before installation, please confirm that the wall and floor tiles of the bathroom have been completed, and the sewage pipe, waterway and electrical appliances have been reserved as shown in the following figure. And select the relative toilet based on the roughing in (300mm/400mm). Inlet pressure range: 0.15 Mpa (dynamic state)-0.75Mpa (static state), Inlet water temperature: 4-35°C.

#### 2. Assembly of special inlet valve

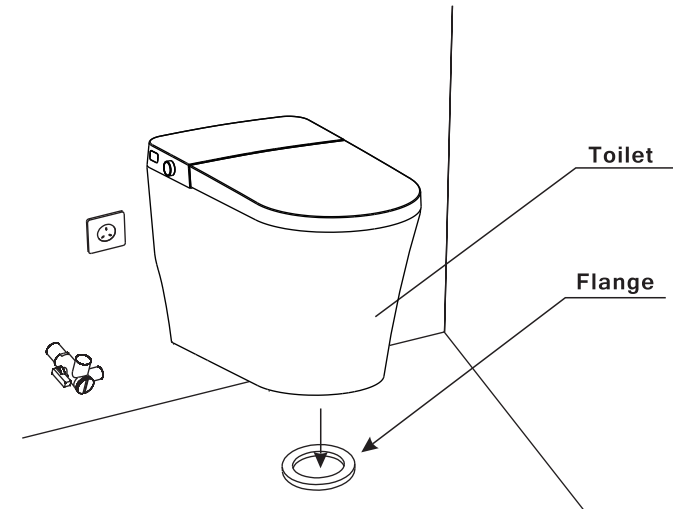

Install the inlet valve attached to the product to the outlet pipe.

◆ Note: Remove the inlet valve if it has been installed before.

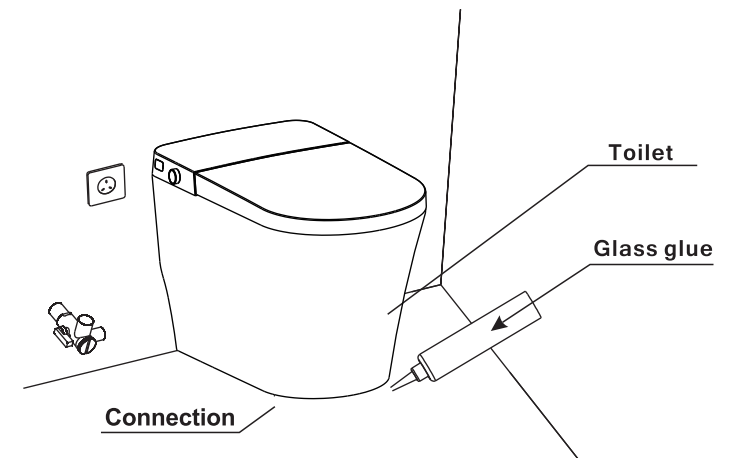

#### 3. Installation and fixation of the toilet

<1> Place the flange with a layer of glue evenly to the up and down ends on the outlet. Then aligning the outlet of toilet bottom to flange and gently placing the toilet on the ground from top to bottom.

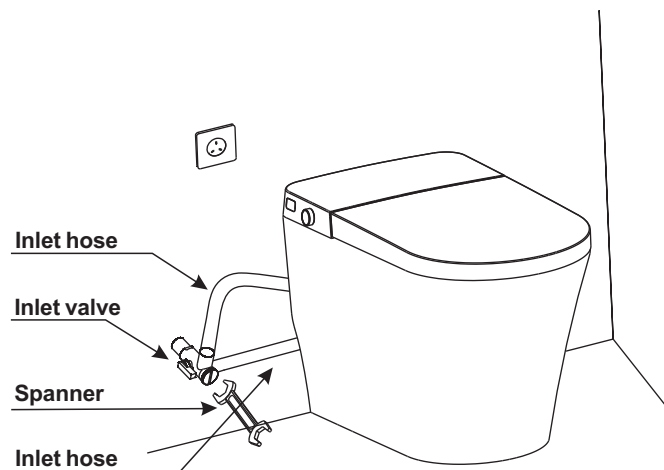

<2> Apply a layer of glass glue at the bottom of toilet.

#### 4. Connection for the inlet water pipe

Connect the inlet pipe with the inlet valve & filter cotton by using the tools like spanner.

◆ Notice: Turn on the water inlet valve after installation to check whether it leaks.

#### ■ The installation method of remote control

##### 1. Verify the installation of remote control batteries(Medium version)

Open the battery cover of the remote control and put the two alkaline batteries ( No7 ) into the remote control one by one.

- When installing the battery, do not put the positive and negative sides of the battery in reverse.
- Do not use different or different types of batteries at the same time.
- Remove the battery when it is not in use for a long time.

##### 2. The usage of Chargeable remote control (high grade version )

- The remote control need to be charged before first time using.
- Please charge the remote control by the TYPE-C USB cable which match with 5V charger.

##### 3. Confirm the installation location of the remote control.

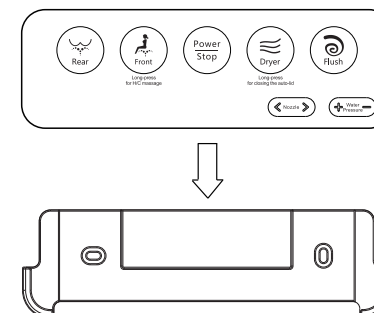

Install the remote control in an easy - to - operate position on the toilet.

##### 4. Install the remote control bracket on the wall.

Tear off the protective tape of 3M tape on the back of bracket and apply to the selected dry tile surface.

##### 5. Install remote control.

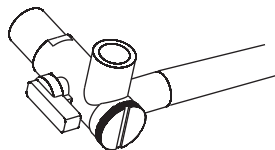

Align the remote control with the bracket, insert it from top to bottom, and the installation is complete.

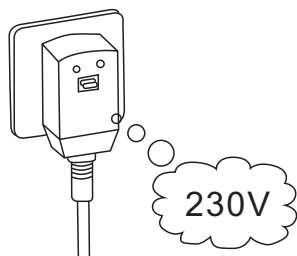

## The Preparation of Use

### 1. Open the inlet valve.

Rotate the valve anticlockwise until the inlet valve fully open.

### 2. Plug the power plug into the socket.

<1> Inserting power plug into the 230V socket, the intelligent toilet will auto-running inspection once, then the mainframe will be on the standby mode.

- ◆ The auto-rolling seat cover and seat ring will be in the position automatically. do not stop it by force.
- ◆ Do not use the wiring board beyond the power specifications.
- ◆ The socket must have safety ground lead.

<2> press this button , or vertically press the rotary function button on the cover, then white lamp halo will be light up and the toilet will be working.

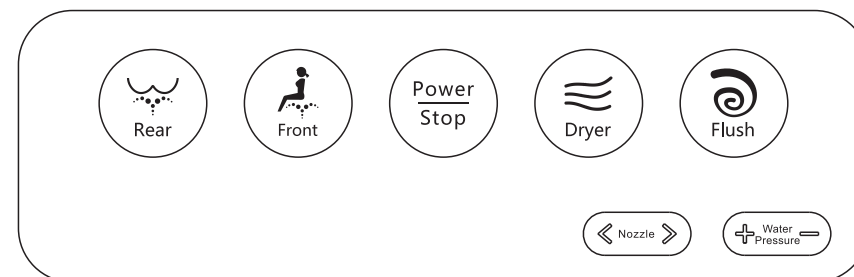

### 3. Set the temperature of the water to the proper level.

### 4. Refer to the function instruction, press the buttons on remote control to fulfill every functions.

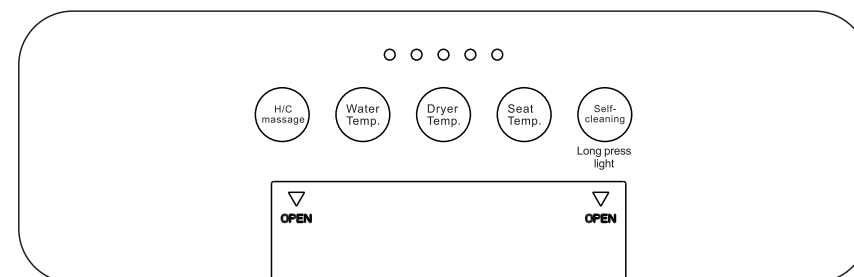

## Main Board Acquaintance

This product could be controlled mostly by remote control, assistant by operate panel.

### ◆ Remote control main board

Front

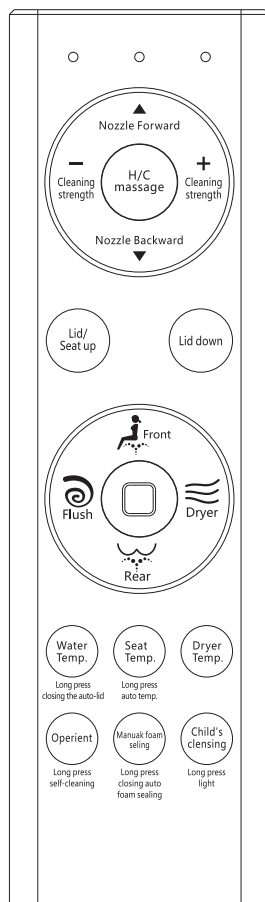

Back

Applicable model: medium type

## Cleaning and Maintenance

### ■ Clean and maintain power plug

Please clean the power plug regularly: when cleaning, remove the power plug from the socket and wipe it with dry cloth.

● Dust accumulated on the power plug may cause fire.

### ■ Clean and maintain the main engine part of intelligent toilet

When cleaning the surface of the main engine, please wipe it with a soft wet cloth.

<1> When cleaning and maintaining, please pull the power plug out of the socket to avoid contact with water.

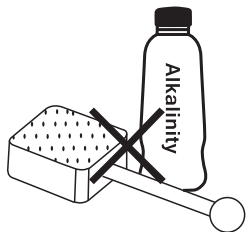

<2> If the surface has stubborn blot, you can use a soft wet cloth with kitchen detergent (neuter) to swab.

### ■ Clean and maintain the ceramic part of intelligent toilet

You can pour a neutral toilet cleaner into a soft brush or sponge and rinse with tap water.

<1> Do not use detergent or disinfectant contained with chlorine or acidity.

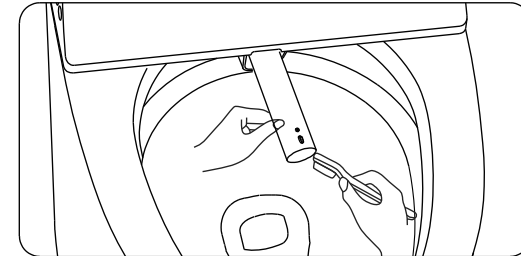

<2> Do not use brushes with abrasive materials.

### ■ Cleaning and maintain of nozzle

In the normal operating status, please press the nozzle cleaning button  or long press the Operient button  on remote control, the nozzle will stretch out and auto-clean. You could use the tooth-brush to clean it at the same time.

Please do not stretch the nozzle by force.

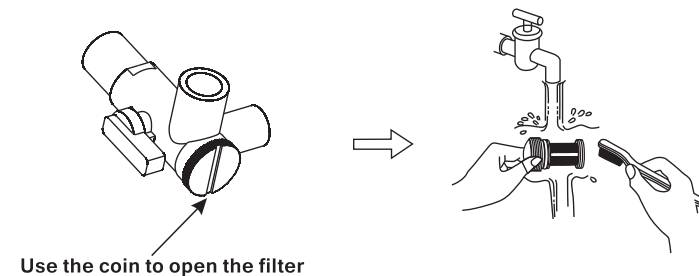

### ■ Cleaning and maintain of water inlet filter

<1> Shut off the inlet valve first to stop water supplying .

<2> Use coin to open the filter counterclockwise, then clean it by brush or water directly.

<3> Reinstall the filter and screw up. Do not leave behind the seal ring of filter.

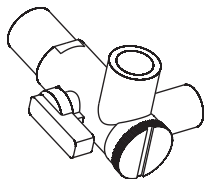

<4> Open the inlet valve to check if leakage. if there is any leakage , please recheck and reinstall .

## ■ Not to use for a long time

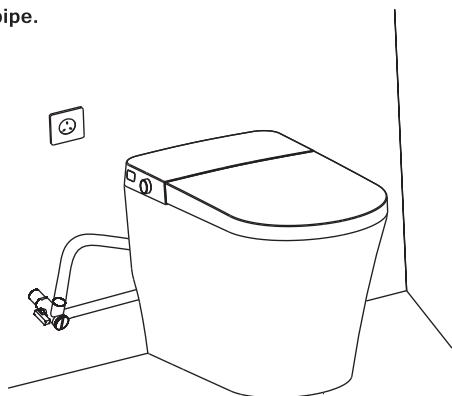

When not to use this product for a long time , please do the following operation : draining out all the water in smart toilet to prevent water pollution or frozen; shutting off the power; taking out the batteries in the remote control.

<1> Shut off the inlet valve first , stop supplying water.

<2> Pull off the plug from the power socket.

<3> Remove the inlet pipe from the the inlet valve to drain out the water inside pipe and reinstall the pipe.

◆ When reusing the product , you can just open the inlet valve, put the plug into the socket and starting up.

## ■ Frozen

In winter, the intelligent toilet may be damaged for the frozen inside. To prevent the frozen, please keep the power on and operate as follows :

◆ Set the temperature of seat and water to the highest level.

◆ In case the inlet pipe frozen inside, the nozzle can not work, please use warm cloth to heat the inlet valve or open the heating also can fixed this problem.

## ■ Moisture condensation

Because the temperature and humidity are different between indoor and ceramic pan/seat cover , the ceramic pan and seat cover may be moisture condensation. Please change air completely in the bathroom in case of moisture condensation.

◆ In case of moisture condensation, please use the dry cloth to scrub.

## ■ Change the batteries in remote control

Change new batteries when remove control insensitive or the indicator could not work.

◆ Do not mistake the positive pole and negative pole when install the batteries.

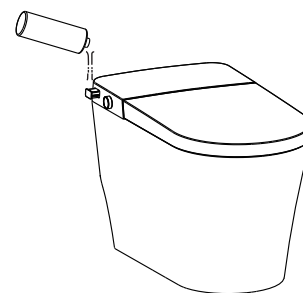

◆ Do not mix the different type of battery.

◆ Please take out the battery if not using for a long time.

## ■ Addition of foam fluid (Automatic payment)

When bubbles do not come out, please add foam liquid.

◆ Unscrew the bottle cap, bottle mouth to the toilet foam liquid add slot, pour liquid not too fast, when the liquid is notWhen it can flow down, it means it is full of liquid.

## FAQ

Some problems can be fixed by simple operation. Please confirm below items before entrusting service.

Problem		Reason	Solution
Not working after pressing the power button(no light)		The socket power on or not?	Please check if power out or tripping operation
		Does power plug switch close or not? Are power indicator on plug off?	Press the reset button on power plug to light the indicator.
		Is it the power plug connected well?	Reconnect the power plug
Remote control is insensitive or not working		The battery run out of power	Change new battery
Remote control is insensitive or not working		The battery run out of power	Charging the remote control
The temperature of seat cover, washing water and dryer are not heat enough.		Check if the setting of remote control correct or not?	Setting related temperature
		Check if it is in power-saving state?	Close the power-saving function
Button not working		Some buttons are no response on normal working state.	Some operations can not working in the same time, please read the instruction carefully.
Nozzle could not spray water or low spray water pressure	Can hear alarm	The water supply cut off?	Waiting for water supply
		Inlet valve open or not?	Open the inlet valve
		The filter blocking	Clean the filter
	Can not hear alarm	Low water pressure or you have set the low level water pressure on remote control.	Press the button  or  to increase the water pressure
		Have you hear “di” when sitting? Whether it is in the range of the sensor?	Please sit down on the seat cover and make sure you have proper posture

## Product specification

Voltage		230V~ 50Hz
Power rate		1300W(inflow15°C (+/-1°C) , water pressure 0. 24Mpa, max level for rear washing)
Length of power line		1.2M
Water pressure		0. 15Mpa (dynamic pressure ) ~0. 75Mpa (static pressure)
Water level		Level 1
Flushing quantity		Less then 4.0 L
Cleaning water consumption		Less then 0.3L/min
Energy consumption per unit cycle		Less then 0.03kW • h
Product size		LWH:703*390*449mm
Weight		42KG
Cleaning device	Heating way	Instantaneous hot water heater
	Water pressure	4 level to be adjusted
	Water temperature	4 lever to be adjusted: low level 35°C; medium level 37°C; high level 39°C; normal level
	Max power rate for water heating	1600W
	Safety device	Thermal cut-off
Heating seat cover	Power rate	48W
	Seat over temperature	4 lever to be adjusted: low level 35°C; medium level 37°C; high level 39°C; normal level
	Safety device	Thermal cut-off
Drying device	Wind speed	More than 4m/s
	Power rate for air heating	300W
	Wind temperature	4 levels to be adjusted : 35°C-55°C (can set the normal level)
	Safety device	Thermal cut-off/recoverable heat protector
Executive standard		GB4706.1-2005 GB4706.53-2008 GB38448-2019

## Packing List

**Dear customer:**

**Please open the packing box of the product and count the following items in the box:**

- 1.One pc of toilet
- 2.One set of instruction manual (warranty card included)
- 3.One pc of certification
- 4.One pc of remote control (with mounting bracket)
- 5.One pc of dedicated angle valve
- 6.One pc of flange ring
- 7.One bottle of cleaning foam liquid (with connector ) if the style is with the function of foam shield.

## Operation record

After installation, please try to operate the toilet and write down result below.

Item	Result		
Power socket is AC 230V+/-10% , load more than 2000W ?			
Power socket loose or not? And connected well or not ?			
Do the connection of fittings loose? or found any leakage ?			
Lighting up on toilet ?			
Nozzle leakage ?			
Function of rear washing is well or not ? (including levels adjustment)			
Function of lady washing is well or not ? (including levels adjustment)			
Function of wide washing is well or not ? (including levels adjustment)			
Function of water temperature is well or not ? (including levels adjustment)			
Function of seat cover temperature is well or not ? (including levels adjustment)			
Function of nozzle cleaning is well or not ?			
Remote control function is well or not ?			
Function of manual flushing and auto-flushing is well or not ?			
Function of drying is well or not ? (including levels adjustment)
